

CyberEdge®

Addressing Companies' Top Priority

A recent AIG survey found C-suite executives, risk managers, and IT decision makers ranked risks for their companies as follows:

Cyber Risk:	86%
Loss of Income:	82%
Property Damage:	80%
Workers' Compensation:	78%
Utility Interruption:	76%
Securities and Investment Risk:	76%
Auto/Fleet Risk:	65%

CyberEdge® is a comprehensive risk management solution for cyber insurance offered by AIG. In a rapidly changing landscape, CyberEdge® provides innovative protection to help businesses safeguard against sensitive data breaches (personal and corporate data), computer hacking, dumpster diving, computer viruses, employee sabotage or error, pilferage of information, security failures, business interruption and identity theft.

Most high-profile stories in the media today address the type of data loss that impacts people on a personal level; credit card numbers, medical records, birth dates, ID/passport numbers and other private personal information.

We should also be mindful of the impact from the loss of corporate data and information such as intellectual property and proprietary information, which in the hands of a competitor or even an extortionist can severely disadvantage business.

We help you stay ahead of the curve and provide responsive guidance based on years of experience. The protection that CyberEdge® provides is a valuable additional layer to the most powerful first line of defense against cyber threats a company's own IT system.

More people are at risk

Virtually all companies handle personal and corporate data on a daily basis, whether it be identity card numbers and corresponding profiles of employees, credit card information, sensitive demographic information about customers' information on budgets, customer lists, share prospectus or marketing plans. The same companies face very real liabilities if such data falls into the wrong hands or enters the public domain.

More claims examples equals increased demand

Clients are realising the risk to data and are beginning to request policies with enhanced coverage. AIG has launched the most innovative insurance product in addressing these issues: CyberEdge®.

Providing a Comprehensive Solution

With CyberEdge®, we help you respond to an incident better, quicker, and more systematically.

A response typically requires:

- Computer forensics to determine the cause of an event.
- Compliance with the diverse notification requirements of 46 states and many other jurisdictions.
- Crisis management to mitigate reputational damage.
- Hiring legal counsel to advise your company with regard to its response to an incident.
- Adherence to regulatory requirements of all relevant jurisdictions.

Responsive Guidance

- Our CyberEdge® teams located around the world are responsive and react quickly to give guidance when needed, from assessing your needs through processing your claims.
- With CyberEdge®, you have instant access to the best and most experienced claims specialists and other strategists to advise you when you need it. The strong relationships we have with vendors, including forensic, legal, and communications, ensure rapid support.

Experience

- We have been protecting companies against cyber risk since the late 1990s when the cyber insurance industry was in its infancy.
- Our team has underwritten thousands of cyber policies.
- Some of the largest companies and more than 20 million individuals have trusted us to help respond to some of the biggest data breaches.

Ahead of the Curve

- Constantly monitoring the cyber landscape, we stay at the forefront of the industry as cyber risks continue to evolve.
- Our innovation becomes your protection.
- Companies have the flexibility to tailor coverage options to ensure they are able to promptly respond and prevent future or more costly damages.

Other Policy Gaps

Most traditional insurance policies do not provide adequate coverage or protection in the event of these evolving exposures:

- **Professional Indemnity/ Professional Liability (PI)** – Broadly worded PI policies are tied to “professional services” and may have a requirement that there be an act of negligence.
- **Commercial General Liability** - Advertising Injury/Personal Injury has potential exclusions/limitations around financial loss and online web advertising.
- **Crime** – Requires intentional acts trigger and only covers money, securities, and tangible property.
- **Kidnap and Ransom** – No coverage without a “cyber-extortion” amendment.
- **Property** – Data is not considered tangible property. CyberEdge® is a specially designed solution which addresses the liability of companies arising from data protection laws, the management of personal data and the consequences of losing corporate information.

The Cost of Data Breaches

Research has shown that data breach costs tend to be linear; the more records comprised the greater the costs. Expenses associated with a large data breach include:

- **Detection, escalation, notification and response** – A sophisticated attack by a hacker may take months to uncover, after which the full extent of the damage may not be known for several additional months.
- **Lost business** – Business can be lost both as a result of customer attrition as well as difficulty in attracting new customers.
- **Fines and penalties**
- **Damages** – Individuals and businesses that claim to have been damaged as a result of a data breach often seek compensation.
- **Lost productivity** – While difficult to quantify, lost productivity can be a very real cost of a data breach.
- **Additional audit and security requirements** – Companies experiencing a data breach may deem it necessary to implement enhanced monitoring and auditing protocols.
- **Miscellaneous additional costs** – Additional costs arising from a data breach can include legal fees, consultant fees and various settlement costs.²

Advisen Special Report Sponsored by AIG, "An Anatomy of a Data Breach: Disaster -Avoiding a Cyber Catastrophe." 2011

Coverage includes:

- **Personal Data Liability** – Breach of personal information/Data Protection.
- **Corporate Data Liability** –Breach of corporate information.
- **Outsourcing** – Breach of Data Protection by an Outsourcer where the Data User or Policyholder is legally liable.
- **Data Security** – Damage resulting from any breach of duty that ends in:
 - Contamination by Malicious Code of Third Party Data
 - Improper or wrongful denial of access by an authorized Third Party to Data
 - The theft of an access code from premises, computer system, or employees
 - The destruction, modification, corruption, damage or deletion of Data stored on any Computer System due to a Breach of Data Security
 - Unauthorized access, use or transmission of a malicious code against Third Party due to a breach of Data Security
 - The physical theft of hardware
 - Data disclosure due to a Breach of Data Security
- **Defence Costs** – Both Civil and Criminal, including defence costs in respect of any regulatory investigation or criminal prosecution brought by a public authority.

American International Group, Inc. (AIG) is a leading international insurance organization serving customers in more than 130 countries and jurisdictions. AIG companies serve commercial, institutional, and individual customers through one of the most extensive worldwide property-casualty networks of any insurer. In addition, AIG companies are leading providers of life insurance and retirement services in the United States. AIG common stock is listed on the New York Stock Exchange and the Tokyo Stock Exchange.

AIG is the marketing name for the worldwide property-casualty, life and retirement, and general insurance operations of American International Group, Inc. For additional information, please visit our website at www.aig.com. Products and services are written or provided by subsidiaries or affiliates of American International Group, Inc. Not all products and services are available in every jurisdiction, and insurance coverage is governed by actual policy language. Certain products and services may be provided by independent third parties. Insurance products may be distributed through affiliated or unaffiliated entities. Certain property-casualty coverages may be provided by a surplus lines insurer. Surplus lines insurers do not generally participate in state guaranty funds and insureds are therefore not protected by such funds.
